710	709	707	10		

Ende

Standard QF end can be changed to Raw ID (RI), Raw OD (RO), RawFlex / Hose (RF), Flat Bar Flange (FFL), or 6mm turned out edge (FB).

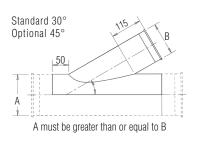

Construction

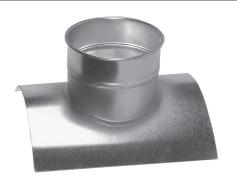

Longitudinal seam type: goove (lockform) seam

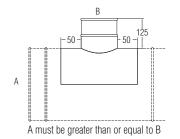

Collars: located on the exterior side of each port and considered as air flow non-directional. Collars have lapped, spot welded and caulted longitudinal seam

If air flow directional product is required, it must be stated on the PO and additional cost may be incurred. A raised lap seam and spot weld are used for attaching the collar to the body and no caulking is used. If caulking is required, additional cost may be incurred.

Temperature Rating of Product Components					
° C	Cut-in Branch	Sealants			
200°	0.1				
121°	Galvanised Steel	3M Metal Sealant			
-20°	Otooi	2084			

Compliance / Rating of Product Components					
Product	Material	Compliance / Rating			
Cut-in Branch	Galvanised	JIS G 3302 with G90 Rating			
3M Metal Sealant 2084	Acetone blend	AAMA Specification 801.1			

Additional Notes

At temperatures ranging between 200° C and 250° C, the zinc-iron alloy layers in galvanised steel will continue to provide a high level of protection from corrosion. However, there may be some peeling, changes in mechanical properties, and reduction in the corrosion protection. Recommended max. service temperature is 200° C.
