The SBBB is a circular compressed air powered automatic slide damper for rapid and tight closure. Since the damper is opened and closed automatically, extraction is always focused on the connections, extraction points, or machines currently in operation. This maximises extraction power, with lower energy consumption as a bonus.

Compliance / Rating of Product Components

Product	Material	Compliance / Rating
SBBA Automatic Damper	Galvanised	DX51D with Z275 Coating
Sealing Ring	Poron Ring	PEHD/PORON

-10°C		
-20°C		

Construction:

Ends: Standard QF end can be changed to Raw ID (I/D), Raw OD (O/D), or 6 mm turned out edge (FB).

Additional Notes

At temperatures ranging between 200° C and 250° C, the zinc-iron alloy layers in galvanised steel will continue to provide a high level of protection from corrosion. However, there may be some peeling, changes in mechanical properties, and reduction in the corrosion protection. Recommended max. service temperature is +75°C.

Ø120 only available in FB system.

304SS available upon request.

Optional cover/shield plate is available upon request.

- The damper should be connected to clean and dry compressed air
- Working pressure 5 to 8 bar
- Maximum temperature 80° C
- Voltage: 230 V AC (Coils for 24-110 V AC & DC optional, see website for item numbers)
- ATEX coil and solenoid optional
